	Watford Junction
	Harrow Bus Station
	Edgware Station
	Watford Bus
	Watford Bus

Bus Passes, Permits and Travelcards with their existing Photocards will still be accepted on these routes.

What about routes outside Harrow?

Because this is a test of the new technology, cardreaders will only be fitted to the buses on the Harrow area routes listed in this leaflet.

On other London buses and London Transport services outside the Harrow area, your **Smart Photocard** simply replaces your old Photocard, and you must show a valid Bus Pass, Permit or Travelcard as usual.

We're sure you will appreciate that we must test the new cards properly before converting all our bus services. If our tests prove successful, the **Smart Photocard** will become Londonwide.

Further information - 071 918 4123

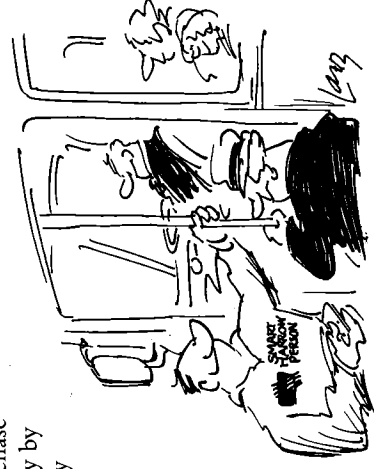

If you would like more information or have any comments about the **Smart Photocard** scheme, please don't hesitate to talk to us. Please ask our advisors at the Harrow Bus Station Smartcard office or call the Advice Helpline on **071 918 4123** (Answerphone service out of office hours).

Also look out for an information bus which will be touring the area. See local press for more details.

The next step

London Transport is developing another type of Smartcard to suit different passengers' lifestyles.

The **Farecard** will be tested later on in the trial and will appeal to travellers who may not always wish to purchase a period pass or pay by cash each time they board a bus.

SMART PHOTOCARD

SMART PHOTOCARD. The new passport to Harrow's buses.

London Transport is testing an exciting new ticket technology. Instead of having to show your Photocard and Bus Pass, Permit or Travelcard to the driver, you could have a **Smart Photocard**. The same size and shape as a credit card, it acts as both Photocard and Bus Pass, Permit or Travelcard, and it's read by a cardreader as you board the bus. You don't even have to take it out of its wallet!

The system puts London at the forefront of developments in new ticket technology. Its first large-scale trial begins in the Harrow area soon.

Who is eligible for a Smart Photocard?

All passengers holding 7 day and longer period Bus Passes, Permits or Travelcards which are valid in the Harrow area. You cannot apply for a **Smart Photocard** with a One day Bus Pass, LT Card or One day Travelcard.

How do I get my Smart Photocard?

You can exchange your current Photocard for the new **Smart Photocard** at Harrow Bus Station. There's no need to bring a photograph – we will take your picture, free of charge, in much less time than a photo booth takes.

Where can I update my Smart Photocard?

Your local newsagent cannot issue **Smart Photocards**, but will be able to renew, update or extend their validity period. Look out for this sign at selected newsagents:

Later on in the trial local Underground stations will also be able to update your **Smart Photocard**.

The **Smart Photocard** service will not be available at British Rail stations or bus garages.

Smartcard service

available here

Do I have to pay extra for my Smart Photocard?

No. There is no additional charge. If you hold a 7 day or longer period Bus Pass, Permit or Travelcard you can simply exchange your current Photocard for a new **Smart Photocard**.

Using your Smart Photocard

We will give you a demonstration on how to use your new **Smart Photocard**, but there is nothing difficult about it. When you board a **Smartcard Bus**, briefly place your **Smart Photocard** on the cardreader as indicated.

You won't even need to take it out of its wallet or show it to the driver. If the green and orange lights show, and you hear a single tone, your card has been accepted and you should pass into the bus. If a red light shows, and there's a repeated tone, your card may not be valid and you should speak to the driver.

Please remember to keep your Bus Pass, Permit or Travelcard with you at all times as the bus driver or an inspector may need to see it.

The cardreaders are alongside the driver's ticket machine.
