„ VIII.† Steam Boilers	40

* Parts II., III., IV. and VII. are also issued
separately (Forms 71, 72, 73, 74).

† The forms of Report, to be attached to Part VIII.,
are issued separately (Form 55).

INSTRUCTIONS.

The General Register must be produced whenever required by any of H.M. Inspectors of Factories and Workshops. An old Register must be kept for at least two years after the date of the last entry.

Any entry made by the Occupier or on his behalf is, as against him, *prima facie* evidence of the facts therein stated; and failure to make any entry with respect to the observance of any provision of the Factory Act, 1901, is admissible as *prima facie* evidence that the provision has not been observed.

- I. General.** The Occupier must enter in Part I. all the particulars required therein.
- II. Young Persons.** The Occupier must enter in columns 2 to 6 of Parts II. and III. particulars of all young persons and children employed*, and in the case of a factory, or of a workshop to which the requirement extends (*see Abstract*), the Certificates of Fitness (Columns 7 to 11) must be obtained from the Certifying Surgeon, as follows:—
- III. Children.**
- Certificates of Fitness.** A young person under sixteen or child, must not be employed in a Factory, or in a Workshop to which the requirement extends, for more than *seven* (or if the Certifying Surgeon resides more than three miles therefrom, *thirteen*) work days without a certificate of fitness for employment therein. This certificate can only be given by the Certifying Surgeon for the district, and by means of signed entry in the General Register.† He cannot grant it except after personal examination; nor elsewhere than at the works, unless fewer than five *young persons and children* are employed there. The certificate may be qualified by conditions as to the work on which the young person or child is fit to be employed. When a child becomes a young person a fresh certificate of fitness, for full time employment, must be obtained.
- Educational Certificates— for Children; for Young Persons under 14.** A child under twelve cannot be employed. A child above twelve may be employed for half-time if he has obtained a "Labour Certificate" from the local School Authority qualifying for half-time employment. This certificate must be kept by the Occupier, and the date entered in column 6 of Part III.
- A child who has reached the age of thirteen, and has obtained a certificate from the local School Authority qualifying for full time employment‡, is regarded as a *young person*. The certificate must be kept by the Occupier, and the date entered in column 6 of Part III.
- IV. Accidents.** The Occupier must enter in Part IV. the particulars of every Accident of which notice is required to be sent to the Inspector (*see Abstract and Notice of Accident Form (Form 43)*).
- V. Industrial Poisoning.** The Occupier must enter in Part V. the particulars of every case of Anthrax or of poisoning by lead, phosphorus, arsenic, or mercury.
- VI. Limewashing.** The Occupier must enter in Part VI. particulars as to the limewashing, painting with oil, varnishing, or washing with hot water and soap, required by the Act (*see Abstract*). If in any part of the premises exemption from this requirement is claimed under a Special Exception, entry to that effect must be made in Part VI.
- VII. Employment in Shop.** If the Occupier at any time employs a woman or young person on the same day both in the factory or workshop, and also in a shop before or after the period of employment entered on the *Abstract*, the required entries must be made in Part VII.
- VIII. Steam Boilers.** The Occupier must cause a thorough examination of every Steam Boiler to be made every 14 months; and a signed report of the examination, in the prescribed form (*Form 55*), to be attached to this Register within 14 days.
- Overtime Register (Form 338), List of Outworkers (Form 44).** These are special registers. The former must be kept in every factory, workshop and laundry where overtime is worked under a special exception. The latter must be kept in every factory, workshop and laundry in the business of which outworkers are employed in certain classes of work (*see Abstract*), and in every place from which such work is given out.

* Employment is thus defined by the Act:—"A woman, young person, or child who works in a factory or workshop, whether for wages or not, either in a manufacturing process or handicraft, or in cleaning any part of the factory or workshop used for any manufacturing process or handicraft, or in cleaning or oiling any part of the machinery, or in any other kind of work whatsoever incidental to or connected with the manufacturing process or handicraft, or connected with the article made or otherwise the subject of the manufacturing process or handicraft therein, shall, save as is otherwise provided by this Act, be deemed to be employed therein within the meaning of this Act. For the purposes of this Act an apprentice shall be deemed to work for hire."

† The certificate may, if the Certifying Surgeon thinks fit, name all the Works within his district which are in the occupation of the same Occupier. In this case a separate form of certificate is required, and the Occupier must write across column 10 of the Register the number and date of the certificate and the name of the Certifying Surgeon.

‡ In districts where the Education Bye-laws apply to children between thirteen and fourteen, a child of that age cannot be employed full time unless he has satisfied the conditions prescribed by the bye-laws for total exemption.

Part I. GENERAL.

Name of Occupier *Metropolitan District Railway Company*

Full Postal Address of Factory or Workshop *Baling Common Works Baling W*

Name of the Municipal Borough, Urban District, Rural District (or, in Scotland, the Burgh or County District) in which the Factory or Workshop is situate ... *Borough of Baling*

Part VIII. STEAM BOILERS.

See Instructions on page ii. of cover; and Abstract.

Forms of Report are issued separately
(Form 55).

The Reports when received should be
attached to the Register, for which purpose
guards are provided.

Form 55.
October, 1907.

AUTHORISED EDITION.

Not to be reprinted without the consent of the Controller of H.M. Stationery Office.

FACTORY AND WORKSHOP ACT, 1901: SECTION II.

Form prescribed by the Secretary of State, for

REPORT OF EXAMINATION OF STEAM BOILER.

Address of Works

Calington Works
Northampton District Railway Co

Name of Occupier

Vertical, Steam Crane

Description or distinctive number of Boiler, and type

Age
The history should be briefly stated, or reference made to record in earlier reports.

unknown but works opened in 1905

Date of last hydraulic test (if any), and pressure applied.

25 July 1908 - 120 (lbs)

Quality and source of feed water

very good; Northampton Board, Grand Junction Dist.

1. Boiler—

(a) Was the boiler scaled, prepared, and (so far as its construction permits) made accessible, sufficiently for thorough examination and for such tests as may be necessary in order to complete the thorough examination?

(See Note C overleaf.)

yes

(b) What parts (if any) were inaccessible? ...

none

(c) What examination and tests were made?

thoroughly overhauled

(d) Condition.

(State any defects materially affecting the permissible working pressure).

good

External:

good

Internal:

yes

yes

no

2. Mountings—

(a) Are there proper mountings, including safety valve, water gauge, and steam gauge?

(b) Are all mountings properly maintained and in good working order?

(See Note B overleaf.)

(c) Are the water gauges protected?

3. Permissible working pressure for the ensuing 14 months (subject to any conditions stated in paragraphs 4 and 5) calculated from dimensions, and from the thickness and other data ascertained by the present examination; due allowance being made for conditions of working if unusual or exceptionally severe.

80 lbs

4. Repairs (if any) required, and period within which they should be executed.

nil

5. Other observations

I certify that on *25 July 1908*
the above is a true report of the result.

Signature

J Thompson

Qualification

Boiler Smith

Address

Calington Works

Date

25 July 1908

1 thoroughly examined the boiler above described, and that

Counter-signature
(when required by s. 11).

Name of Company
or Association.

Date

C.—According to the type of boiler, facilities must be given by the occupier for such examination (internal and external), hammer testing, drilling, lifting, hydraulic testing, steam trial, or other means of testing as may be necessary for the thorough examination. Thus, the boiler should be opened out, cleaned and scaled; doors of man-holes, mud-holes, and hand-holes taken off; fire-bars removed, and (in case of Lancashire and Cornish boilers) fire-bridges if of brick; all connections opened out; safety valves taken adrift, cleaned and re-adjusted. Where necessary, brickwork must be removed for the purpose of inspection of vital parts of the external surface of the boiler.

B.—Where a further inspection is necessary in order to complete the thorough examination required by the Act (*e.g.*, to inspect the mountings under working conditions), a provisional entry may be made in the appropriate column of the report, provided that the thorough examination is completed within the statutory period of 14 months, and a supplementary report thereof on this form is inserted in the register.

The occupier of the factory or workshop is responsible for seeing that the provisions of this section are fulfilled, including the employment of a *competent* person to make the examination; and in the event of default is liable to a fine not exceeding ten pounds.

(6) For the purposes of this section, the whole of a tenement factory or workshop shall be deemed to be one factory or workshop, and the owner shall be substituted for the occupier, and he shall register the report referred to in this section.

(5) This section shall not apply to the boiler of any locomotive which belongs to and is used by any railway company, or to any boiler belonging to or exclusively used in the service of His Majesty.

(4) A factory or workshop in which there is a contravention of this section shall be deemed not to be kept in conformity with this Act.

(3) A report of the result of every such examination in the prescribed form, containing the prescribed particulars, shall within fourteen days be entered into or attached to the general register and, if that person is an inspector of a boiler-inspecting company or association, by the chief engineer of the company or association.

(2) Every such boiler, safety valve, steam gauge and water gauge must be maintained in proper condition.

(1) Every steam boiler used for generating steam in a factory or workshop or in any place to which any of the provisions of this Act apply must, whether separate or one of a range—

(a) have attached to it a proper safety valve and a proper steam gauge and water gauge to show the pressure of steam and the height of water in the boiler; and

(b) be examined thoroughly by a competent person at least once in every fourteen months.

(1) Every such boiler, safety valve, steam gauge and water gauge must be maintained in proper condition.

A.—The Factory and Workshop Act, 1901, s. 11, requires as follows:—

NOTES.

Scaled & prepared for test.

(See Note C overleaf.)

(b) What parts (if any) were inaccessible?

none

(c) What examination and tests were made?

Thoroughly examined. Tested with Hydraulic Pump

(d) Condition.

(State any defects materially affecting the permissible working pressure.)

External:

good

Internal:

good

2. Mountings—

(a) Are there proper mountings, including safety valve, water gauge and steam gauge?

yes

(b) Are all mountings properly maintained and in good working order?

yes

(c) Are the water gauges protected?

yes

3. Permissible working pressure for the ensuing 14 months (subject to any conditions stated in paragraphs 4 and 5) calculated from dimensions, and from the thickness and other data ascertained by the present examination; due allowance being made for conditions of working if unusual or exceptionally severe.

10 lbs

4. Repairs (if any) required, and period within which they should be executed.

none

5. Other observations

none

C.—According to the type of boiler, facilities must be given by the occupier for such examination (internal and external), hammer testing, drilling, lifting, hydraulic testing, steam trial, or other means of testing as may be necessary for the thorough examination. Thus, the boiler should be opened out, cleaned and scaled; doors of man-holes, mud-holes, and hand-holes taken off; fire-bars removed, and (in case of Lancashire and Cornish Boilers) fire-bridges if of brick; all connections opened out; safety valves taken adrift, cleaned and readjusted. Where necessary, brickwork must be removed for the purpose of inspection of vital parts of the external surface of the boiler.

B.—Where a further inspection is necessary in order to complete the thorough examination required by the Act (*et c.*), to inspect the mountings under working conditions), a provisional entry may be made in the appropriate column of the report, provided that the thorough examination is completed within the statutory period of 14 months, and a supplementary report thereon in this form is inserted in the register.

The occupier of the factory or workshop is responsible for seeing that the provisions of this section are fulfilled, including the employment of a *competent* person to make the examination; and in the event of default is liable to a fine not exceeding ten pounds.

(6) For the purposes of this section, the whole of a tenement factory or workshop shall be deemed to be one factory or workshop, and the owner shall be substituted for the occupier, and he shall register the report referred to in this section.

(5) This section shall not apply to the boiler of any locomotive which belongs to and is used by any railway company, or to any boiler belonging to or exclusively used in the service of His Majesty.

(4) A factory or workshop in which there is a contravention of this section shall be deemed not to be kept in conformity with this Act.

(3) A report of the result of every such examination in the prescribed form, containing the prescribed particulars, shall within fourteen days be entered into or attached to the general register of the factory or workshop, and the report shall be signed by the person making the examination, and, if that person is an inspector of a boiler-inspecting company or association, by the chief engineer of the company or association.

(2) Every such boiler, safety valve, steam gauge and water gauge must be maintained in proper condition.

(1) Every steam boiler used for generating steam in a factory or workshop or in any place to which any of the provisions of this Act apply must, whether separate or one of a range—

(a) have attached to it a proper safety valve and a proper steam gauge and water gauge to show the pressure of steam and the height of water in the boiler; and

(b) be examined thoroughly by a competent person at least once in every fourteen months.

A.—The Factory and Workshop Act, 1901, s. 11, requires as follows:—

Form 55—OCTOBER, 1907.

REPORT OF EXAMINATION OF STEAM BOILER.

As prescribed under Factory and Workshop Act, 1901: Section II.

Address of WorksEaling Common Works, London, W.
Name of Occupier Messrs The Metropolitan District Railway Co.,
St.James' Park Station, London, S.W.
Description or distinctive number of Boiler and type No.1 water tube Boiler Babcock & Wilcox
marine type.
New 1904.

Age... ..
The history should be briefly stated, or reference made to record in earlier reports.
Date of last hydraulic test (if any), and pressure applied No information.
Quality and source of feed water Towns - sedimentary.

1. Boiler—
(a) Was the boiler scaled, prepared, and (so far as its construction permits) made accessible, sufficiently for thorough examination and for such tests as may be necessary in order to complete the thorough examination? Yes.
(See Note C overleaf.)
(b) What parts (if any) were inaccessible? Externally under covering and some of the internal surfaces.
(c) What examination and tests were made?... .. External and internal. No hydraulic test.

(d) Condition
(State any defects materially affecting the permissible working pressure.)
External: The right wing header at the back end is corroded below the bottom cap to 1/8" deep through leakage and some of the other headers are corroded at the same part to about 1/16" deep.
Internal: Twenty seven of the caps were removed in the mud drums and the interior surfaces as (For continuation see over.)

2. Mountings—
(a) Are there proper mountings including safety valve, water gauge and steam gauge? Yes.
(b) Are all mountings properly maintained and in good working order? Yes so far as seen.
(See Note B overleaf.)
(c) Are the water gauges protected? Yes.

3.*Permissible working pressure for the engine 14 months 100 lbs.per square inch.

4. Repairs (if any) required, and period within which they should be executed None.
5. Other observations None.

*This pressure is subject to any conditions stated in paragraphs 4 and 5, and is calculated from dimensions, and from the thickness and other data ascertained by the present examination; due allowance being made for conditions of working if unusual or exceptionally severe.

FEEs OF CERTIFYING SURGEONS.

The fees of the Certifying Surgeon for the examination of children and young persons, and grant of certificates of fitness for employment, are to be paid by the Occupier.

The Factory and Workshop Act, 1901, s. 124, enacts as follows :—

(1.) The fees to be paid to a Certifying Surgeon in respect of the examination of, and grant of certificates of fitness for employment for, young persons and children shall be regulated as follows :—

(a) The occupier of the factory may agree with the Certifying Surgeon as to the amount of the fees ;

(b) In the absence of agreement the fees shall be in accordance with the scale set forth in Part I. of the Fifth Schedule to this Act, or with such scale as may be substituted therefor by the Secretary of State ;

(c) The occupier shall pay the fees on the completion of the examination, or if any certificates are granted, at the time at which the Surgeon signs the certificates, or at any other time directed by an Inspector.

FIFTH SCHEDULE—PART I.

FEEs ON EXAMINATION FOR CERTIFICATES OF FITNESS FOR EMPLOYMENT.

When the examination is at the factory or workshop.

2s. 6d. for each visit and 6d. for each person after the first five examined at that visit ; and also if the factory or workshop is more than one mile from the Surgeon's residence, 6d. for each complete half mile over and above the mile.

When the examination is not at the factory or workshop, but at the residence of the Surgeon, or at some place appointed by the Surgeon for the purpose.

6d. for each person examined.
