

Silent cinema gem on silver screen

THE British classic, *Piccadilly* (1929), will be screened at London Transport Museum next Tuesday as a part of its Night Shift exhibition.

The film stars Anna May Wong as Shosho, a scullery maid in a fashionable nightclub who rises to become the toast of London. Overlooked at the time, it is now recognised as a masterpiece of the silent era. The film will be accompanied by Stephen Horne, one of the UK's premier silent film pianists.

The Night Shift exhibition runs until April 10, 2016.

Metro reader offer

The museum is offering Metro readers a reduced price for the film screening. Tickets are now £12 for adults (concessions £9).

To get the discount, book online at www.ltmuseum.co.uk using the code 'PICCADILLY'. Doors open at 6.30pm at London Transport Museum in Covent Garden.

New film to make London's roads safer

'We make over 35,000 decisions every day. A bad one on the road can be fatal.'

THAT'S the message of TfL's latest road safety campaign. Coinciding with Road Safety Week, the hard-hitting advert outlines the danger of taking one risk too many. Watch the film by searching YouTube for 'one risk is one too many'.

Road safety data indicates that 93 per cent of all factors that contributed to recorded collisions in London were owing to human error. This is why TfL is focusing on addressing the five main sources of road danger:

- Travelling too fast
- Becoming distracted
- Undertaking risky manoeuvres
- Driving under the influence of alcohol or drugs
- Failing to comply with the laws of the roads

TfL has made significant progress in reducing the number of people killed or seriously injured on London's roads in the past decade. This has enabled the organisation to meet the Mayor's target to reduce the number by 40 per cent, six years early. These figures are now at their lowest level

When driving, glancing at your phone just once is one risk too many

Why take the risk? TfL's new hard-hitting road safety campaign

since records began. To build on this, the Mayor has now set a new target for a 50 per cent fall by 2020. Meeting this

would mean a reduction of around 10,000 deaths or serious injuries over the next five years.

Traffic Twitter feed reaches half-a-million followers

MORE social media-savvy commuters than ever are benefiting from TfL's Twitter feeds.

The @TfLTrafficNews handle, which lets people check for disruption and congestion on major roads, now boasts more than half-a-million followers who rely on it for traffic info on the go. More than 500,000 people now receive live traffic information helping them minimise delays, making it the biggest traffic news feed in Europe.

The official feed @TfL, which shares general news and announcements, has

an impressive 887,000 followers.

TfL has more than 20 official Twitter feeds, each providing real-time travel updates. Every Tube line has a feed, as well as buses, London Overground, DLR, Santander Cycles and the Emirates Air Line.

Other feeds include those for general travel alerts, Oyster card queries and information for people with accessibility needs.
